PROFESSIONAL PROFILE

Junior Java Full Stack Developer with a background in Engineering Physics and experience in programming, technical problem-solving, and software development. Hands-on experience with JavaScript, HTML, CSS, databases, and APIs through practical projects. Seeking to launch my professional career in software development, contribute to real-world projects, and continuously strengthen my technical skills.

TECHNICAL SKILLS

Java | Spring Boot | REST APIs | MySQL | JavaScript | HTML | CSS | Git | GitHub | C | C# | C++ | MATLAB | Node.js | Python | IntelliJ IDEA | Postman | Visual Studio Code | LaTeX | GNU Octave

SOFT SKILLS

Analytical Thinking | Problem-Solving | Teamwork | Effective Communication | Adaptability | Continuous Learning

ACADEMIC PROJECT

Microstructural Evaluation of Human Skin Using a Polarization State Analyzer | UAM June 2026

- Developed Python software to automate the acquisition and processing of polarimetric images.
- Implemented image and data analysis using NumPy, OpenCV, and Matplotlib.
- Integrated a Raspberry Pi 4, IMX477 camera, and optical components into a functional experimental prototype.

WORK EXPERIENCE

Java Developer | LUDUS — Social Network August 2026 - October 2026

- Designed wireframes and prototypes for LUDUS's main interfaces using Figma, defining the visual structure and navigation flow prior to platform development.
- Developed responsive components and interfaces for the web application using HTML5, CSS3, and Bootstrap, helping maintain a consistent user experience across different screen sizes.
- Developed the platform's About Us section using HTML, Bootstrap, CSS, and JavaScript, integrating responsive content, information cards, and visual transitions aligned with the project's visual identity.

Social Service | UAM Azcapotzalco February 2026 - August 2026

- Installed and configured Raspberry Pi 4 systems and Arducam IMX477 cameras for laboratory image acquisition applications. The system is currently used for image acquisition at the UAM Azcapotzalco Complex Systems Laboratory.
- Designed components and supports using 3D modeling and participated in the assembly and maintenance of experimental optics and optoelectronics infrastructure currently used in UAM Azcapotzalco classrooms.
- Developed a technical manual for the use of Raspberry Pi systems and cameras, which is currently used as supporting material for the Digital Image Processing course.

Customer Service Representative | Marriott February 2018 - June 2024

- Assisted and managed customer requests related to the Marriott Bonvoy loyalty program, benefits, accounts, and company services.
- Analyzed customer issues and provided solutions in accordance with internal policies and procedures while maintaining clear and customer-focused communication.
- Developed problem-solving, conflict management, effective communication, and multitasking skills while handling multiple customer requests.

EDUCATION

- **Generation Mexico Bootcamp | Java Full Stack Developer** August 2026 – October 2026
- **B.S. in Engineering Physics | UAM Azcapotzalco** September 2017 – August 2026 (Degree in progress)

COURSES

- **Programming Foundations with JavaScript, HTML and CSS | Duke University** (Octubre 2026)
- **Agile Project Management | University of Colorado Boulder** (Octubre - 2023)
- **Introduction to JAVA | Accenture** (Septiembre 2023)

LANGUAGES

- **English |** C1
- **Spanish |** Native
